

Custom Branded Traps for Private Label

Web-Cote Industries specializes in manufacturing high-quality glue traps for private label programs. We offer custom solutions tailored to your brand, ensuring consistency, performance, and professionalism across your pest control products.

Printing Process & Capabilities

We use a flexographic narrow web print press to deliver durable, high-quality results.

- Supports Pantone (PMS) color printing
- Up to three (3) colors per design (Six (6) colors coming early 2026)

Requirements for Private Label Production

To produce custom-branded traps, the following requirements must be met prior to production:

- **Vector-Based Logo / Artwork:** Adobe Illustrator (.AI or .EPS) files are required for crisp, accurate printing. In some cases, a print-ready PDF may be accepted.

Note: Vector format alone does not guarantee production readiness. Artwork must be built with clean, closed shapes and appropriate detail for flexographic printing.

- **Artwork Restrictions:** Canva files, AI-generated artwork, or auto-traced imagery are not accepted. These files often contain excessive detail, fragmented paths, and uncontrolled color data that cannot be reliably reproduced on press.
- **PMS Color Specifications Required:** Pantone (PMS) colors are required to ensure color consistency across all printed materials. CMYK, RGB, and HEX color builds are not accepted.
- **Artwork Responsibility & Rights:** All artwork supplied must be production-ready. **Artwork that does not meet manufacturing standards will be returned for correction prior to production.** Any artwork created by Web-Cote Industries remains our intellectual property. Unauthorized use, duplication, or reproduction is strictly prohibited.
- **Finalized Contract:** Production begins only after a signed agreement is in place.
