Focused Expertise for the Pest Management Industry

At Web-Cote Industries, adhesive monitoring products aren't simply part of what we manufacture – they're our specialty.

Since 1986, we've partnered with companies throughout the pest management industry to manufacture adhesive monitoring products that support early detection, informed decision-making, and responsible pest management practices. By focusing exclusively on adhesive solutions, we've developed decades of manufacturing expertise dedicated to performance, consistency, and quality.

Today, our products are used in food processing facilities, commercial buildings, agricultural operations, residential environments, and countless other applications where monitoring plays an important role in protecting public health, food safety, and property.

As your manufacturing partner, our focus remains where it belongs, on your brand and the customers you serve.

Supporting Responsible Pest Management

Effective pest management begins with good information.

Adhesive monitoring products provide valuable insight into pest activity, helping identify species, detect changes over time, and evaluate the effectiveness of pest management programs as part of Integrated Pest Management (IPM) and Assessment-Based Pest Management (APM) strategies.

At Web-Cote, we believe monitoring should guide informed decision-making. Through education, product development, industry partnerships, and initiatives like the Responsible Glue Trap User (RGTU) Certification Program, we support the thoughtful, responsible use of adhesive monitoring products while advancing professional standards across the pest management industry.

Our Capabilities

Rodent Monitors

- Mouse
- Rat
- Snake
- Spider

Insect Monitors

- Moth Traps (pantry, clothing)
- Roach Traps (low line)
- Beetle, Fruit Fly, Silverfish & more
- Window Fly Catchers
- Stink Bug Traps
- Glue Rolls
- Fly Paper

Insect Light Trap Replacement Boards

- UV Fly Light Boards (Fluorescent & LED)

Agriculture

- Plant Stakes
- Greenhouse Monitoring Cards
- Delta Traps
- Flat Fly Strips (fly sticks)
- Fly String
- Tree Banding Rolls
- Fly Panels
- Hard Glue Sticky Traps
- Soft Brushable Glue

MEET WEBSTER The Pest Control PROfessor

Professional Monitoring Solutions

Built on decades of adhesive manufacturing expertise, Pro-Trap™ represents Web-Cote's commitment to thoughtful monitoring and dependable performance. Designed to support early detection and informed decision-making, Pro-Trap products reflect the same quality, consistency, and manufacturing excellence trusted by the brands we produce every day.

Manufacturing Solutions for Pest Management

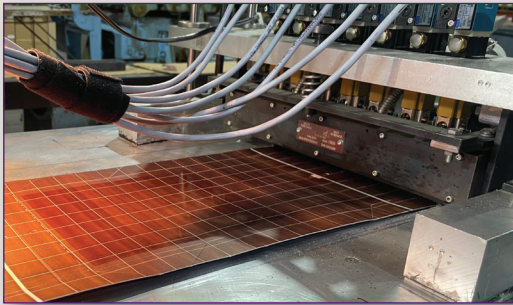

Web-Cote combines specialized adhesive coating, in-house flexographic printing, and precision converting to manufacture adhesive monitoring products for customers throughout the pest management industry. Our integrated manufacturing capabilities support both OEM and private label programs with the flexibility, consistency, and quality needed for reliable production.

Printing

Our in-house printing capabilities help bring your products to market while keeping your brand front and center.

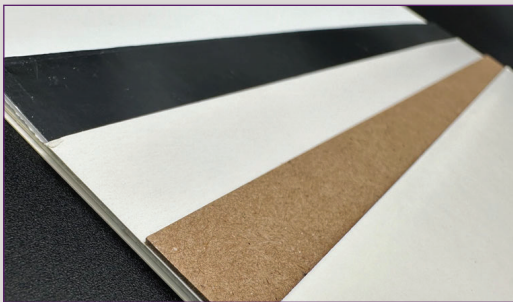

- In-house flexographic printing
- Double-sided printing capability
- Up to six PMS/Pantone colors

Adhesive Coating

Our specialized coating equipment allows us to manufacture adhesive monitoring products for a wide variety of applications, environments, and product formats.

- Coating widths from 0.025" to 12"
- Adhesive thickness options from 2–50 mils
- Two-sided coating capability
- Custom coating patterns and die-cut formats
- Ability to coat a wide range of materials, from paperboard to narrow substrates

Substrates

We work with a variety of materials depending on product application and environmental requirements.

- Milk carton stock for moisture resistance
- SBS and CCNB paperboard
- PVC, PE, PP and polyester plastics
- Release liners and specialty papers
- Foil materials

This flexibility allows us to manufacture adhesive monitoring products for a wide range of pest management, agricultural, and specialty applications.

**Every adhesive monitoring product has a purpose.
Every observation has value.
Every decision starts with good information.**

About Web-Cote Industries

Founded in 1986, Web-Cote Industries specializes in manufacturing adhesive monitoring products for the pest management industry.

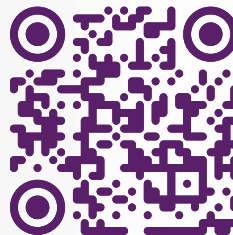

In 2024, longtime industry leader Susan Masciarelli acquired Web-Cote, making the company proudly 100% woman-owned. Today, Web-Cote continues to combine decades of adhesive manufacturing expertise with a commitment to innovation, responsible monitoring, and exceptional customer partnerships.

Whether manufacturing OEM products, developing private label solutions, or producing our own Pro-Trap™ line, every product we make reflects the same singular focus: **GLUE IS ALL WE DO!™**

The products we manufacture support the essential work of protecting public health, food safety, and property and we take that responsibility seriously.
